

Hospitality Streaming Services

UNSW
SYDNEY

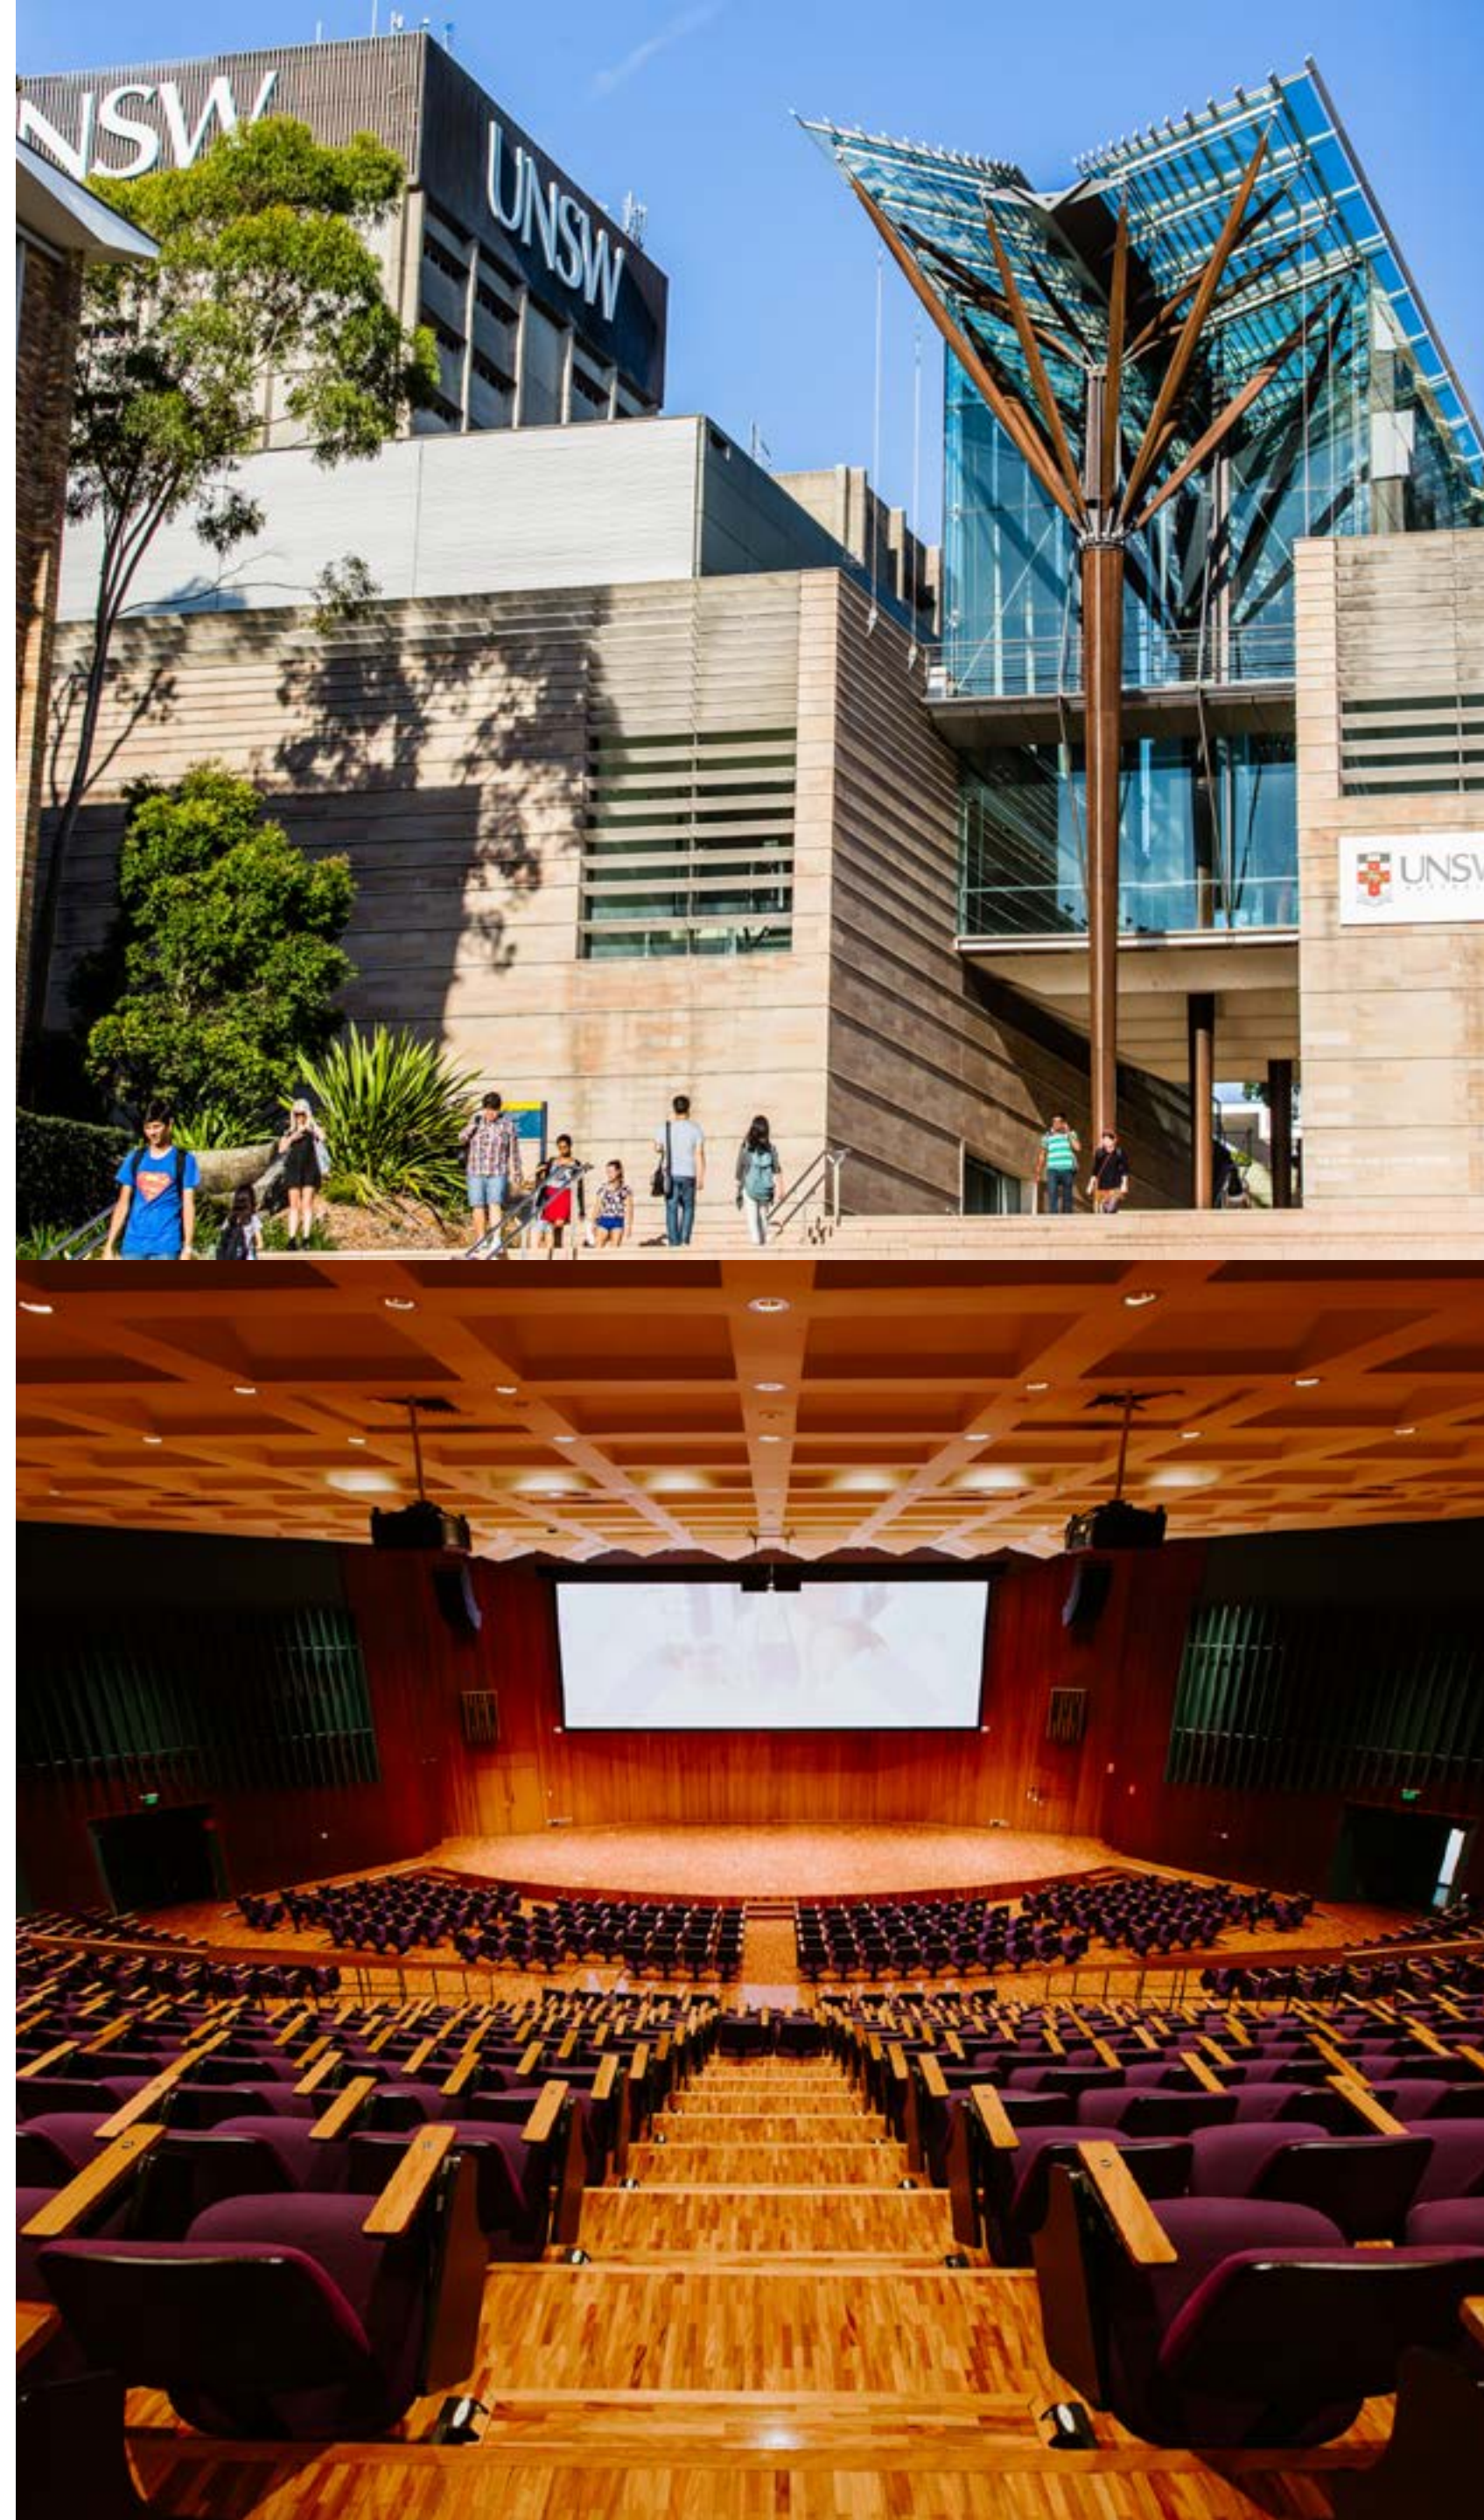

Hybrid Streaming Packages

These packages are designed for use in the following venues:

- Clancy Auditorium
- Leighton Hall
- Tyree Room
- Science Theatre

For any venues other than the above, additional equipment may be required depending on the requirements of the client and the existing audio visual infrastructure in the venue.

All package costs noted in this brochure are for streaming services only and are in addition to venue hire charges.

Tier 1 Package

The Bronze package provides a basic streaming experience for your audience and is ideal for events with one concurrent speaker with presentation slides such as a Town Hall, lecture or briefing. This package includes a fixed single camera shot of one presenter on stage, which is displayed as a small PiP (Picture-in-Picture view) next to the presentation slide content being streamed.

This configuration will remain for the entirety of the stream and does not allow for dynamic close-up shots of members of a panel. This solution is most suited to basic events and short streams where online engagement is not as essential.

Picture in Picture

- 1 x Audio visual operator
- 1 x Fixed camera (no operator)
- Streamed as picture-in-picture
- PowerPoint and camera displayed side by side (fixed shot)
- HD Recording (on request)

Included with venue hire*

*\$1,100 when required outside of venues listed on the previous page

Tier 2 Package

This package includes a camera operator and live switch operator which allows for different camera angle shots and close-ups of the speaker/s, creating a more engaging experience for the audience. This configuration allows for content to be live switched between full screen slide content and full screen camera shots. The camera operator allows for flexibility in the camera content being captured which can be focused on a single presenter or presenters, as well as capturing a single fixed wide shot of the stage.

This package is recommended for events where the online viewing experience is important, where majority of the speeches are done from the lectern with minimal panel discussions taking place.

Basic Production

- 1 hour stream
- Setup / pack down
- 1 x Live stream operator
- 1 x Audio visual operator
- 1 x Camera with operator
- 1 x Fixed camera (no operator)
- Live mixing between slides, camera, and PiP
- HD Recording

\$2,330

*Additional cost as listed on the next page

Tier 3 Package

This package is designed for UNSW external facing and high-profile events and provides the best experience for your online audience that UNSW Hospitality team can offer. The package includes three camera operators enabling multiple camera shots, allowing for seamless switching between close-up of single presenter and wide shots of a panel simultaneously. This configuration allows for full screen content to be live switched between the various camera angles. This solution is designed to ensure your online audience will stay engaged as the streaming experience closely follows what is being communicated in real time.

This package is recommended for events with a lot of action on stage and is ideal for events with multiple panel sessions or performances.

Full Production

- 1 hour stream
- Setup / pack down
- 1 x Live stream operator
- 1 x Vision operator
- 1 x Audio operator
- 2 x Cameras (both with an operator)
- 1 x Fixed shot camera (no operator)
- Live mixing between slides, camera, and PiP
- Lower thirds (Presenter names on screen)
- HD Recording
- Multitrack audio recording

\$3,870

*Additional cost as listed on the next page
